

LITOSTROJ
POWER

We are a company that successfully continues the Czech and Slovenian tradition of developing and manufacturing water turbines and hydromechanical equipment. Under the world-renowned LITOSTROJ brand, we offer complete solutions for hydropower equipment from design to turnkey implementation. Our water turbines, industrial and transformation equipment and pumps are located in more than 60 countries. Litostroj is proud industrial branch of ENERGO – PRO Group, originally a Czech company which after gradual expansion operates hydro power plants in eastern Europe, including electrical distribution grid.

We invite candidates who are challenged by:

- ✓ Responsibility for organization, management, implementation, coordination,
- ✓ management and realization of projects in the local and international environment,
- ✓ the most developmentally and technologically demanding program in mechanical engineering - the program of water turbines and hydromechanical equipment,
- ✓ quality culture and goal-oriented company culture.

We are looking for:
